

# TECHNICAL MEMORANDUM

## Utah Coal Regulatory Program

---

January 5, 2004

TO: Internal File

THRU: Dave Darby, Team Lead

FROM: Wayne H. Western, Environmental Scientist III, Bonding

RE: 2003 Midterm Review, Consolidation Coal Company, Emery Deep Mine, C/015/0015, Task ID #1782

### **SUMMARY:**

As part of the midterm review, the Division evaluates the reclamation cost estimate and bond amount. The Division found that the bond amount and reclamation cost estimate are adequate.

The Division is now escalations the reclamation costs from midterm to midterm. Therefore, there will be an increase in the reclamation cost as the estimate is escalated for 5 years. The Division also requires the Permittee include a copy of the Division's bond calculations in the mining and reclamation plan. The Division will give the Permittee a copy of those calculations. The Permittee will need to submit the calculations as an amendment.

TECHNICAL MEMO

---

**TECHNICAL ANALYSIS:**

**RECLAMATION PLAN**

**BONDING AND INSURANCE REQUIREMENTS**

Regulatory Reference: 30 CFR Sec. 800; R645-301-800, et seq.

**Analysis:**

**Determination of Bond Amount**

As part of the midterm review, the Division evaluates the reclamation cost estimate and bond amount. The Division now escalates the reclamation cost estimate from midterm of permit issuance to midterm of consecutive permit issuance. Therefore, the reclamation cost estimate likely will be increased as part of this midterm review.

The current bond amount is \$3,454,443. The reclamation cost estimate escalated for five years is \$2,208,000. The reasons why the bond amount is higher than the reclamation cost estimate are: 1) the bond amount was based on several expansion projects that have since been cancelled, and 2) the Permittee had a one time payment bond, so decreasing the bond was not in the Permittee's best interest.

The bond amount is adequate to insure reclamation of the site should the Permittee forfeit the bond. No change to the bond amount is required at this time.

**Findings:**

The Bond information in the MRP is adequate to meet the minimum requirements of the regulations.

**Recommendations:**

The Division should consider the midterm review complete and that there are no deficiencies
